HISTORY OF THE VIENNA CLASSIFICATION

At the request of a number of industrial property offices of member countries of the Paris Union, the United International Bureaux for the Protection of Intellectual Property (BIRPI)—predecessor of the World Intellectual Property Organization (WIPO)—began working with a Committee of Experts set up in 1967 by the BIRPI Interunion Coordination Committee on the drafting of an international classification of the figurative elements of marks. The classification was established by an agreement concluded on June 12, 1973, at the Vienna Diplomatic Conference.

The countries party to the Vienna Agreement Establishing an International Classification of the Figurative Elements of Marks (hereinafter referred to as “the Vienna Agreement” and “the Classification,” respectively) have adopted and apply a common classification for the figurative elements of marks.

The Vienna Agreement entered into force on August 9, 1985. The following countries are party to it (January 1, 2007): Armenia, Austria, Bulgaria, Croatia, Cuba, France, Guinea, Jamaica, Kyrgyzstan, Luxembourg, Mexico, Moldova, Netherlands, Poland, Romania, Saint Lucia, Slovenia, Sweden, Trinidad and Tobago, Tunisia, Turkey, Turkmenistan, Uruguay (23).

PURPOSE AND SCOPE OF THE VIENNA CLASSIFICATION

The purpose of the Classification is essentially the practical one of facilitating trademark anticipation searches and obviating substantial reclassification work when documents are exchanged at the international level. What is more, the countries party to the Vienna Agreement no longer need to draw up their own national classification or keep an existing one up to date.

Article 4 of the Vienna Agreement provides that, subject to the requirements prescribed by the Agreement itself, the scope of the Classification is that attributed to it by each of the countries party to the Vienna Agreement, and that, in particular, the Classification does not bind those countries in respect of the extent of the protection afforded to the mark. Thus, any of those countries may give the Classification legal scope, over and above the purely administrative implications under the Vienna Agreement.

STRUCTURE OF THE VIENNA CLASSIFICATION

The Classification constitutes a hierarchical system that proceeds from the general to the particular, dividing all figurative elements into categories, divisions and sections. Where appropriate, explanatory notes have been introduced. They concern either the Classification as a whole or any given category, division or section.

The sections are of two kinds. In addition to main sections, there are auxiliary sections intended for figurative elements that are already covered by the main sections, but which it is considered useful to group according to a particular criterion for ease of anticipation searching.

Every category, division and section has been given a number according to a special coding system. Every figurative element in a section is referred to by three numbers: the first, which may be any number from 1 to 29, denotes the category; the second, which may be any number from 1 to 19, the division; and the third, which may be any number from 1 to 26, the section. For instance, the representation of “a little girl eating” belongs to Category 2 (Human beings), Division 5 (Children), Main Section 3 (Girls) and Auxiliary Section 18 (Children drinking or eating).

The number of divisions and sections varies according to the categories and divisions to which they belong. Within the divisions and sections, certain numbers have been left vacant in order to permit the introduction of new divisions or sections when necessary.

This publication contains the sixth edition of the Classification, which comprises a total of:

29 categories,
144 divisions,
788 main sections, and
879 auxiliary sections.

The examples of figurative elements relating to certain divisions, which are reproduced on pages 107 to 125, are included for information purposes only, and are therefore not an integral part of the Classification.

USE OF THE VIENNA CLASSIFICATION

The countries party to the Vienna Agreement may apply the Classification either as a principal or as a subsidiary system. Thus, they have the possibility of continuing, if they see fit, to use their national classification at the same time as the Vienna Classification, either as a transitional or as a permanent measure.

The competent offices of countries party to the Vienna Agreement are obliged to include in the official documents and publications relating to registrations and renewals of marks the numbers of the categories, divisions and sections in which the figurative elements of those marks have been placed. “Documents and publications” mean, in particular, entries in the trademark register, registration and renewal certificates and publications of registrations and renewals in office journals or gazettes.

The numbers of the categories, divisions and sections appearing in official documents and publications relating to registrations should be preceded, for ease of comprehension, by the full name “Classification of Figurative Elements” or by the abbreviation *CFE* (see page (xx)). It is recommended that the edition of the Vienna Classification according to which figurative elements of marks are classified be indicated by an Arabic numeral in round brackets, for example, CFE (6).

The Classification is sufficiently detailed for each section to contain only a relatively small number of figurative elements, even when used by large industrial property offices, thereby facilitating anticipation searches. It is perhaps too detailed, however, for offices that register relatively few marks. Countries party to the Vienna Agreement may therefore declare that they reserve the right not to include the numbers of all or some of the sections in official documents and publications relating to registrations and renewals of marks (Article 4(5) of the Vienna Agreement). Moreover, the “auxiliary” sections, the numerical code of which is preceded by an “A” in the Classification, are in any event not mandatory; national offices may use them at their discretion.

REVISIONS OF THE VIENNA CLASSIFICATION

The Classification published here is based on that approved on June 12, 1973, at the Vienna Diplomatic Conference.

Pending the entry into force of the Vienna Agreement, a provisional Committee of Experts, set up under a resolution adopted by the Vienna Diplomatic Conference on June 8, 1973, met in 1975 and 1976 to draw up proposals for amendments and additions to the original version of the Classification. Those proposals, after having been incorporated in the original version of the Classification, were published in a provisional edition in 1977.

Following the entry into force of the Vienna Agreement, the Committee of Experts set up under Article 5 of the Agreement, at its first session, in Geneva in May 1987, approved the majority of the amendments and additions proposed by the provisional Committee of Experts. At its second, third, fourth and fifth sessions, held in Geneva, respectively in June 1992, October 1996, October 2001 and November 2006, the Committee of Experts adopted a number of amendments and additions. The corresponding changes have been incorporated in the Classification.

At its third session, held in Geneva in October 1996, the Committee of Experts adopted a new presentation of the Classification which consists in placing, within each division, the auxiliary sections at the end of the division, in marking the principal sections with an asterisk and in placing the auxiliary sections under appropriate headings.

EDITIONS OF THE VIENNA CLASSIFICATION

The first edition of the Classification was published in 1973, the second in 1988, the third in 1993, the fourth in 1997 and the fifth in 2002.

This edition (the sixth), published in June 2007, will enter into force on January 1, 2008. It replaces the previous editions.

LANGUAGES OF THE VIENNA CLASSIFICATION

The Classification has been established in English and French, both texts being equally authentic.

Have agreed as follows:

Article 1

Establishment of a Special Union; Adoption of an International Classification

The countries to which this Agreement applies constitute a Special Union and adopt a common classification for the figurative elements of marks (hereinafter designated as “the Classification of Figurative Elements”).

Article 2

Definition and Deposit of the Classification of Figurative Elements

- (1) The Classification of Figurative Elements comprises a list of categories, divisions and sections in which the figurative elements of marks are classified, together with, as the case may be, explanatory notes.
- (2) The Classification of Figurative Elements is contained in one authentic copy, in the English and French languages, signed by the Director General of the World Intellectual Property Organization (hereinafter designated respectively as “the Director General” and “the Organization”) and deposited with him at the time that this Agreement is opened for signature.
- (3) The amendments and additions referred to in Article 5(3)(i) shall also be contained in one authentic copy, in the English and French languages, signed by the Director General and deposited with him.

Article 3

Languages of the Classification of Figurative Elements

- (1) The Classification of Figurative Elements shall be established in the English and French languages, both texts being equally authentic.
- (2) The International Bureau of the Organization (hereinafter designated as “the International Bureau”) shall establish, in consultation with the interested Governments, official texts of the Classification of Figurative Elements in the languages which the Assembly referred to in Article 7 may designate in accordance with paragraph (2)(a)(vi) of that Article.

Article 4

Use of the Classification of Figurative Elements

- (1) Subject to the requirements prescribed by this Agreement, the scope of the Classification of Figurative Elements shall be that attributed to it by each country of the Special Union. In particular, the Classification of Figurative Elements shall not bind the countries of the Special Union in respect of the extent of the protection afforded to the mark.
- (2) The competent Offices of the countries of the Special Union shall have the right to use the Classification of Figurative Elements either as a principal or as a subsidiary system.
- (3) The competent Offices of the countries of the Special Union shall include in the official documents and publications relating to registrations and renewals of marks the numbers of the categories, divisions and sections in which the figurative elements of those marks are to be placed.
- (4) The said numbers shall be preceded by the words "Classification of Figurative Elements" or an abbreviation thereof to be determined by the Committee of Experts referred to in Article 5.
- (5) Any country may, at the time of its signature or of the deposit of its instrument of ratification or accession, declare that it does not undertake to include the numbers of all or some of the sections in official documents and publications relating to registrations and renewals of marks.
- (6) If any country of the Special Union entrusts the registration of marks to an intergovernmental authority, it shall take all possible measures to ensure that that authority uses the Classification of Figurative Elements in accordance with this Article.

Article 5

Committee of Experts

- (1) A Committee of Experts shall be set up in which each country of the Special Union shall be represented.
- (2)
 - (a) The Director General may, and, if requested by the Committee of Experts, shall, invite countries not members of the Special Union which are members of the Organization or party to the Paris Convention for the Protection of Industrial Property to be represented by observers at meetings of the Committee of Experts.

(iv) have the right to establish subcommittees and working groups.

(4) The Committee of Experts shall adopt its own rules of procedure. The latter shall provide for the possibility of participation in meetings of the subcommittees and working groups of the Committee of Experts by those intergovernmental organizations referred to in paragraph 2(b) which can make a substantial contribution to the development of the Classification of Figurative Elements.

(5) Proposals for amendments or additions to the Classification of Figurative Elements may be made by the competent Office of any country of the Special Union, the International Bureau, any intergovernmental organization represented in the Committee of Experts pursuant to paragraph 2(b) and any country or organization specially invited by the Committee of Experts to submit such proposals. - (c) Contributions shall become due on the first of January of each year.
- (d) A country which is in arrears in the payment of its contributions may not exercise its right to vote in any organ of the Special Union if the amount of its arrears equals or exceeds the amount of the contributions due from it for the preceding two full years. (7) (a) In the headquarters agreement concluded with the country on the territory of which the Organization has its headquarters, it shall be provided that, whenever the working capital fund is insufficient, such country shall grant advances. The amount of those advances and the conditions on which they are granted shall be the subject of separate agreements, in each case, between such country and the Organization.

(b) The country referred to in subparagraph (a) and the Organization shall each have the right to denounce the obligation to grant advances, by written notification. Denunciation shall take effect three years after the end of the year in which it was notified.

(8) The auditing of the accounts shall be effected by one or more of the countries of the Special Union or by external auditors, as provided in the financial regulations. They shall be designated, with their agreement, by the Assembly.

(2) Amendments to the Articles referred to in paragraph (1) shall be adopted by the Assembly. Adoption shall require three-fourths of the votes cast, provided that any amendment to Article 7 and to the present paragraph shall require four-fifths of the votes cast.

(3) (a) Any amendment to the Articles referred to in paragraph (1) shall enter into force one month after written notifications of acceptance, effected in accordance with their respective constitutional processes, have been received by the Director General from three-fourths of the countries members of the Special Union at the time the amendment was adopted.

(b) Any amendment to the said Articles thus accepted shall bind all the countries which are members of the Special Union at the time the amendment enters into force, provided that any amendment increasing the financial obligations of countries of the Special Union shall bind only those countries which have notified their acceptance of such amendment.

(c) Any amendment accepted in accordance with the provisions of subparagraph (a) shall bind all countries which become members of the Special Union after the date on which the amendment entered into force in accordance with the provisions of subparagraph (a).

Article 12

The country bringing the dispute before the Court shall inform the International Bureau; the International Bureau shall bring the matter to the attention of the other countries of the Special Union.
- (2) Each country may, at the time it signs this Agreement or deposits its instrument of ratification or accession, declare that it does not consider itself bound by the provisions of paragraph (1). RECOMMENDATIONS CONCERNING THE APPLICATION OF THE VIENNA CLASSIFICATION

The Committee of Experts set up under Article 5 of the Vienna Agreement recommended, at its sessions in May 1987, June 1992 and October 1996, to the member countries of the Vienna Union that they apply, in their official documents and publications relating to registrations and renewals of marks, the International Classification of the Figurative Elements of Marks in the following manner:

(a) The numbers of the category and division, and of the division and section should be separated by a point, and the numbers of two different sections by a comma (e.g., Category 3, Division 9, Sections 10, 24 and 25 should be written as follows: CFE 3.9.10,24,25)*; moreover, a dash will be used to indicate an uninterrupted range of sections (e.g., Category 3, Division 9, Sections 16 to 18 should be written as follows: CFE 3.9.16-18); if the numbers of the sections are not included in the classification, the numbers of categories and divisions should still be separated by a point (e.g., Category 3, Division 9 should be written as follows: CFE 3.9).

(b) If the numbers of several categories and divisions are necessary for the classification of one and the same registration, the classification for every category and division should be indicated separately, in numerical order; the various indications should be separated by a semicolon (e.g., CFE 1.1.2,10,25; 1.15.17; 2.9.1 or, if the section numbers are not included in the classification: CFE 1.1; 1.15; 2.9).

(c) The edition of the Vienna Classification according to which figurative elements of marks are classified should be indicated by an Arabic numeral in round brackets, for example, CFE (6).

* The Committee of Experts, at its session in May 1987, determined that the abbreviation referred to in Article 4(4) of the Vienna Agreement and which is to precede the classification numbers where a country chooses to use an abbreviation instead of the words "Classification of Figurative Elements," is to be *CFE*.

VIENNA CLASSIFICATION

GUIDANCE FOR THE USER

In accordance with Article 4(1) of the Vienna Agreement, the scope of the International Classification of the Figurative Elements of Marks (hereinafter referred to as “the Classification”) is that attributed to it by each country party to the Agreement. Its main purpose, however, is in all cases to facilitate anticipation searching. For that searching to be effective, the following two operations have first to be completed:

- (i) consistent and correct classification (coding) of the figurative elements of the marks that are to constitute the search file, due account being taken of the future needs of anticipation searching;
- (ii) correct definition of the sections in which the prior marks have to be searched, due account being taken of the specific characteristics of coding.

The two operations are thus interdependent, and responsibility for them must be entrusted to persons with proven skills in the trademark field. Those persons should among other things be able to assess the figurative elements of marks according to their distinguishing properties.

Before starting to use the Classification, it is essential that the user familiarize himself with the Preface (pages (v) to (viii)), the Recommendations of the Committee of Experts (page (xx)) and the General Notes (page 16).

When using the Classification, the user should abide strictly by the Explanatory Notes and the references given in them.

The Classification itself is reproduced under the following three headings:

- (1) the Table of Categories (page 2), which affords rapid guidance as to the categories available in the Classification;
- (2) the Table of Categories and Divisions, with Explanatory Notes (pages 3 to 13), which gives an outline of the divisions available in a given category and makes it possible to confine the subject matter to the division that seems the most appropriate;
- (3) the List of Categories, Divisions and Sections, with Explanatory Notes (pages 17 to 101), which, with the aid of the complete information given by the explanatory notes on the categories, divisions and sections, makes it possible to decide finally where the figurative element concerned is classified.

The explanatory notes on a category apply also to all its divisions, even if they are not repeated every time.

The divisions are reproduced in the order of their categories, each division being followed by the sections relating to it.

Sections with a letter “A” before their numerical code are auxiliary sections, which group figurative elements contained in the main sections according to specific criteria. The letter “A” should not however appear in the numerical code assigned to the figurative element of a mark at the time of coding.

The examples of figurative elements reproduced on pages 107 to 125 are given for information purposes only, and therefore do not form an integral part of the Classification.

***LIST OF CATEGORIES, DIVISIONS AND
SECTIONS, WITH EXPLANATORY NOTES***

GENERAL NOTES

- (a) Figurative elements should be placed in the different categories, divisions and sections on the basis of their shape, regardless of their material composition or the purpose of the object in which they are incorporated. Consequently, toys in the form of dolls, animals and vehicles are placed in the categories for human beings, animals and vehicles, respectively. Similarly, persons, animals or objects of any kind represented in pictures or sculptures, for instance, are placed in the categories for human beings, animals, or the objects concerned. If the pictures or sculptures are widely known and famous, they should also be placed in the division provided for that purpose (division 22.5).
- (b) The representation of an object forming part of another object should be classified under the same category, division and section as the object of which it forms part, unless expressly classified in another category, division and section. Thus, the bodywork of a motor vehicle is placed in sections 18.1.7 and A 18.1.9, as are motor vehicles, whereas the tyres, wheels or steering wheel of such a vehicle are placed in section 18.1.21, expressly intended for these parts of motor vehicles.
- (c) If a figurative element is presented in such a way that it is not possible to determine clearly whether it belongs to a given division or section, it should be placed in both divisions or sections, unless there is a special note to the contrary. If, for example, the representation of a human being is not such that it can be clearly determined whether it is a man or a woman, it is placed in both of the divisions 2.1 and 2.3.
- (d) The representation of an object or of a living creature similar to that of an object or of a living creature mentioned in the text of a given section is placed in that section even if it is not expressly mentioned there or in any other section.
- (e) It is understood that, if a mark comprises several figurative elements, each of which having its own distinctive characteristic and being classified in a different category, division and section, these figurative elements should be placed in the appropriate different categories, divisions and sections. Thus, the label of a bottle comprising the representation of a castle and a characteristic form of writing is placed in the appropriate divisions and sections of categories 7 and 27; in the same way, the representation of a man in uniform, on horseback and playing a trumpet, is placed in the three sections 2.1.2, 2.1.20 and 2.1.9.
